

A POWERFUL PLATFORM FOR DATA MANAGEMENT AND ANALYSIS

Now offering a unified data storage, analysis and reporting platform.

Honeywell Forge Performance+ for Utilities *Lite* is a streamlined, cost-effective digital platform.

Built on the robust foundation of Honeywell Forge Performance+ for Utilities, this version seamlessly integrates with existing utility systems to enhance advanced data management and analytical capabilities to help ensure operational efficiency and informed decision-making.

Key features of Honeywell Forge Performance+ for Utilities Lite include:

LONG-TERM STORAGE

Secure, extended storage of curated data in the unified digitalization platform (UDP) for greater durability than traditional head-end systems.

CONNECTORS

Easily integrate connectors to ingest NetSense data from the customer's NetSense into the UDP in Honeywell Forge Performance+ for Utilities cloud.

DATA LAKE

A robust data lake to store and manage large volumes of data.

SELF-SERVICE REPORTING

An integrated self-serve BI tool, enabling quick generation of custom reports based on internal data collected.
