Honeywell RMU Program | CM4 to VC4

Regions Affected: **Global**

Dear Customers and Colleagues,

Honeywell values your loyalty and appreciates your business. We also have been hard at work to develop the latest technology in gas measurement and detection. Harmonizing these to maximize your safety, we are excited to announce our Retrofit, Migration, and Upgrade (RMU) program to streamline the process of updating your legacy system with the most current technology.

Customers may take advantage of two potential RMU programs. First, get peace of mind with additional warranties which are available on new devices that replace legacy systems. Second, realize automated sensor or chemcassette order and shipment via our Sensor as a Service (SENaaS) program where sensors and chemcassettes are shipped in time to replace the end of service life component. The SENaaS program is designed to cover supply for a two-year period based on the published service life of your component.

Your CM4 gas detection system has reached end of life. Spare parts are no longer available for many critical components, and should any one of those fail, your system would not be fully recoverable and your facility would be exposed to the risk of insufficient gas detection equipment. Fortunately, a new gas detection solution is available with Honeywell's VC4. The VC4 boasts an intuitive 7" touch screen that is easy to use, built in webserver to view or control the system remotely, the ability to export event data, increased serviceability, and many other benefits. The VC4 is also compatible with CM4 racks for easy transition. Knowing that it takes time to remedy a failed system, we urge you to consider a proactive approach and ask about our RMU programs. The Basic RMU Kit adds an additional year of warranty to the VC4 and the Premium RMU Kit includes two years* of Chemcassettes conveniently shipped as needed. Again, your loyalty and safety are important to us, so as an incentive, this promotional offering provides the Basic and Premium Kits at a discount.

Material	Description	Notes	Basic	Premium
1904C-1000-RMUB	1904C-1000 Extended Warranty 1yr	VC4 110VAC Monitor Base Unit Warranty Extension by 1 year	X	
1904C-1002-RMUB	1904C-1002 Extended Warranty 1yr	VC4 220VAC Monitor Base Unit Warranty Extension by 1 year	X	
1904-0220-RMUP	VC4 FLUORINE SENaaS 24x	Sensor as a Service with 24 total Fluorine Chemcassettes over 2 years		X
1904-0222-RMUP	VC4 HYDROGEN CYANIDE SENaaS 24x	Sensor as a Service with 24 total Hydrogen Cyanide Chemcassettes over 2 years		X
1904-0552-RMUP	VC4 SULFUR DIOXIDE SENaaS 24x	Sensor as a Service with 24 total Sulfur Dioxide Chemcassettes over 2 years		X
1904-0560-RMUP	VC4 XP CHLORINE II SENaaS 8x	Sensor as a Service with 8 total Chlorine II Chemcassettes over 2 years		X
1904-9300-RMUP	VC4 XP6 HYDRIDES SENaaS 4x	Sensor as a Service with 4 total Hydrides Chemcassettes over 2 years		X
1904-9307-RMUP	VC4 XP4 PHOSGENE SENaaS 6x	Sensor as a Service with 6 total Phosgene Chemcassettes over 2 years		X
1904-9308-RMUP	VC4 XP4 CHLORINE SENaaS 6x	Sensor as a Service with 6 total Chlorine Chemcassettes over 2 years		X
1904-9309-RMUP	VC4 XP6 AMINES/AMMONIA	Sensor as a Service with 4 total Amines/Ammonia		X

Terms and Conditions

Sensor as a Service (SENaaS) aims to provide consumable sensors or chemcassettes sufficient to cover the defined period based on the consumable’s normal life expectancy. The actual number of sensors and chemcassettes are not to exceed the value defined in the description “N” where Nx is the total number of consumables that will be provided. Replacement consumables will be shipped four weeks in advance of the installed consumable’s estimated end of service life. This program does not include shipping, installation, startup, or calibration. A quote for the labor to install, startup, and calibrate the consumable is available upon request.

Terms and Conditions for the extended warranties are as defined in the original equipment sale where the only difference is one additional year of similar coverage.

Only one extended warranty year is available per device as part of this program. Quotes for multiple-year extended warranties are available upon request.

All sales of goods or services referenced this offer are conditioned upon the terms and conditions set forth in the Honeywell Sensing Solutions (HSS) Terms and Conditions of Sale for the relevant region, found at <https://www.honeywellsafety.com/legaldocuments-global/>.
