

## Product Notice

# Honeywell RMU Program | Analyzer Upgrade

Regions Affected: **Global**

Dear Customers and Colleagues,

Honeywell values your loyalty and appreciates your business. We also have been hard at work to develop the latest technology in gas measurement and detection. Harmonizing these to maximize your safety, we are excited to announce our Retrofit, Migration, and Upgrade (RMU) program to streamline the process of updating your legacy system with the most current technology.

Customers may take advantage of two potential RMU programs. First, get peace of mind with additional warranties which are available on new devices that replace legacy systems. Second, realize automated sensor or chemcassette order and shipment via our Consumable as a Service (CONaaS) program where sensors and chemcassettes are shipped in time to replace the end of service life component. The CONaaS program is designed to cover supply for a two-year period based on the published service life of your component.

Several internal components of the Analyzer Series 1 and Analyzer Series 2 gas detection systems have reached their end of life. Spare parts are no longer available, and should any one of those fail, your system would not be fully recoverable, and your facility would be exposed to the risk of insufficient gas detection equipment. Fortunately, an upgrade solution is available with Honeywell's Analyzer upgrade program. The Analyzer upgrade will include replacing Series 1 (1291-1000) and Series 2 (1991-1001) systems with Series 3 (1291-1002).

Knowing that it takes time to remedy a failed system, we urge you to consider a proactive approach and ask about our Analyzer upgrade offering. Listed below are the SKUs for extended warranties and CONaaS on the various upgrade options.

Material	Description	Notes	Basic	Premium
1291-1002-RMUB	Vertex AZ Extended Warranty 1yr	Analyzer Series 3 Warranty Extension by 1 year	X	
1295-0221-RMUP	VRTX CC ALIPHATIC AMINES NH3 CONaaS 24x	Consumable as a Service with 24 NH3 Chemcassettes over 2 years		X
1295-0220-RMUP	VRTX CC FLUORINE CONaaS 24x	Consumable as a Service with 24 Fluorine Chemcassettes over 2 years		X
1295-0300-RMUP	VRTX CC HYDRIDES CONaaS 24x	Consumable as a Service with 24 Hydrides Chemcassettes over 2 years		X
1295-0222-RMUP	VRTX CC HYDROGEN CYANIDE CONaaS 24x	Consumable as a Service with 24 Hydrogen Cyanide Chemcassettes over 2 years		X
1295-0225-RMUP	VRTX CC MINERAL ACIDS CONaaS 24x	Consumable as a Service with 24 Mineral Acids Chemcassettes over 2 years		X
1295-0552-RMUP	VRTX CC SO2 CONaaS 24x	Consumable as a Service with 24 SO2 Chemcassettes over 2 years		X
1295-0405-RMUP	VRTX CC XP AMINES /AMMONIA CONaaS 8x	Consumable as a Service with 8 Amines/Ammonia Chemcassettes over 2 years		X
1295-0227-RMUP	VRTX CC XP CHLORINE CONaaS 8x	Consumable as a Service with 8 Chlorine Chemcassettes over 2 years		X
1295-0226-RMUP	VRTX CC XP HYDRIDES CONaaS 8x	Consumable as a Service with 8 Hydrides Chemcassettes over 2 years		X

### **Terms and Conditions**

Sensor as a Service (SENaaS) aims to provide consumable sensors or chemcassettes sufficient to cover the defined period based on the consumable's normal life expectancy. The actual number of sensors and chemcassettes are not to exceed the value defined in the description "N" where Nx is the total number of consumables that will be provided. Replacement consumables will be shipped four weeks in advance of the installed consumable's estimated end of service life. This program does not include shipping, installation, startup, or calibration. A quote for the labor to install, startup, and calibrate the consumable is available upon request.

Terms and Conditions for the extended warranties are as defined in the original equipment sale where the only difference is one additional year of similar coverage.

Only one extended warranty year is available per device as part of this program. Quotes for multiple-year extended warranties are available upon request.

All sales of goods or services referenced this offer are conditioned upon the terms and conditions set forth in the Honeywell Sensing Solutions (HSS) Terms and Conditions of Sale for the relevant region, found at <https://www.honeywellsafety.com/legaldocuments-global/>.
