Honeywell RMU Program | Pyrolizer to NDIR Upgrade

Regions Affected: **Global**

Dear Customers and Colleagues,

Honeywell values your loyalty and appreciates your business. We also have been hard at work to develop the latest technology in gas measurement and detection. Harmonizing these to maximize your safety, we are excited to announce our Retrofit, Migration, and Upgrade (RMU) program to streamline the process of updating your legacy system with the most current technology.

Non-Dispersive Infra-Red (NDIR) customers may take advantage of one such RMU program. This program centers on extra peace of mind via additional warranties which are available on new devices that replace legacy systems.

NDIR technology has proven to be vastly superior to pyrolizers since NDIR devices consume much less power and have longer life spans.

Knowing that it takes time to remedy a failed system, we urge you to consider a proactive approach and ask about our NDIR RMU offerings. Listed below are the SKUs for extended warranties on the various upgrade options.

| Material | Description | Notes | Basic | Premium |
|------------------|--|---|-------|---------|
| MIDAS-I-C4F-RMUB | MIDAS C4F6 NDIR SENSOR EXTEND WRNTY 1YR | Extended Warranty for NDIR C4F6 upgrade by 1 yr | X | |
| MIDAS-I-CO2-RMUB | MIDAS CO2 IR CARTRIDGE EXTEND WRNTY 1YR | Extended Warranty for NDIR CO2 upgrade by 1 yr | X | |
| MIDAS-I-COS-RMUB | MIDAS COS NDIR SENSOR EXTEND WRNTY 1YR | Extended Warranty for NDIR COS by 1 year | X | |
| MIDAS-I-N2O-RMUB | MIDAS N2O IR CARTRIDGE EXTEND WRNTY 1YR | Extended Warranty for NDIR N2O upgrade by 1 year | X | |
| MIDAS-I-SF6-RMUB | MIDAS SF6 SENSOR CART EXTEND WRNTY 1YR | Extended Warranty for NDIR SF6 upgrade by 1 year | X | |
| MIDAS-I-NF3-RMUB | MIDAS NDIR NF3 SENSOR EXTEND WRNTY 1YR | Extended Warranty for NF3 upgrade by 1 year | X | |

Terms and Conditions

Sensor as a Service (SENaaS) aims to provide consumable sensors or chemcassettes sufficient to cover the defined period based on the consumable's normal life expectancy. The actual number of sensors and chemcassettes are not to exceed the value defined in the description "N" where Nx is the total number of consumables that will be provided. Replacement consumables will be shipped four weeks in advance of the installed consumable's estimated end of service life. This program does not include shipping, installation, startup, or calibration. A quote for the labor to install, startup, and calibrate the consumable is available upon request.

Terms and Conditions for the extended warranties are as defined in the original equipment sale where the only difference is one additional year of similar coverage.

Only one extended warranty year is available per device as part of this program. Quotes for multiple-year extended warranties are available upon request.

All sales of goods or services referenced this offer are conditioned upon the terms and conditions set forth in the Honeywell Sensing Solutions (HSS) Terms and Conditions of Sale for the relevant region, found at <https://www.honeywellsafety.com/legaldocuments-global/>.
